

Refugio Groundwater Conservation District

Annual Report of the District

Fiscal Year 2021 – 2022

October 1, 2021 to September 30, 2022

Adopted:

Section 1 - Review of management goals, objectives and performance standards of the District.

The Management Plan of the District, as revised on April 15, 2019, specifies the method for tracking progress in achieving the goals of the District. The management plans states "staff of the DISTRICT will prepare and present an annual report to the Refugio Groundwater Conservation Board of Directors regarding the DISTRICT's performance in achieving management goals and objectives for the fiscal year. The report will be presented within 120 days following the completion of the DISTRICT's fiscal year. The DISTRICT will maintain the report on file for public inspection at the District's offices upon adoption at a meeting of the Refugio Groundwater Conservation Board of Directors."

Based on the review of the activities and projects and an assessment of the associated performance standards of the Refugio Groundwater Conservation District Management Plan between October 1, 2020 and September 30, 2021, the District has determined that all of the goals and associated objectives of the Management Plan of the District have been fully achieved during the fiscal year ending September 30, 2022.

Goal 1: Providing the most efficient use of groundwater – TWC

§36.1071(a)(1) and 31 TAC 356.52(a)(1)(A)

Objective 1: Develop and maintain a water well registration program for tracking well information for wells within Refugio County.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the changes related to water well registration including the number of non-grandfathered and grandfathered wells registered.

The District provided for the efficient use of groundwater by maintaining a water well registration program for tracking well information for wells within Refugio County. The District received 67 well registration requests, registered 58 non-grandfathered wells and 5 grandfathered wells during the fiscal year.

Achievement Level: FULL

Objective 2: Develop and maintain a water well permitting program for processing and tracking all permits authorizing groundwater production.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the changes related to water well permitting including the number of new applications and the disposition of the applications.

The District provided for the efficient use of groundwater by maintaining a water well permitting program for processing and tracking all permits authorizing groundwater production within Refugio County.

The District received no requests for production permits during the fiscal year; the District received no requests to amend existing production permits during the fiscal year; the District received no requests for production permit renewal during the fiscal year; the District issued no production permits during the fiscal year; the District issued no production permit amendments during the fiscal year; and the District issued no production permit renewals during the fiscal year.

The total volume of permitted groundwater production for the permits totals 845.5 acre-feet per year for non-aggregate production permits. The total volume of permitted groundwater production for the permits totals 378.71 acre-feet per year for aggregate production permits. (Note: volumes of groundwater production authorized under aggregate production permits and volumes of groundwater production authorized under non-aggregate production permits are not necessarily mutually exclusive.)

Achievement Level: FULL

Goal 2: Controlling and preventing waste of groundwater – TWC

§36.1071(a)(2) and 31 TAC 356.52(a)(1)(B)

Objective 1: Develop and maintain a water well inspection program for non-exempt wells.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the findings of the inspection activities including information regarding the number of wells that require improvement to control or prevent waste of groundwater.

The District addressed controlling and preventing waste of groundwater by maintaining a water well inspection program during the fiscal year. The District has performed 12 well inspections during the fiscal year. Of those wells inspected, none of wells require improvement to control or prevent waste of groundwater.

The District issued 32 Notices of Intent to Place Casing Receipts (NIPCRs) and observed casing placement for 4 wells.

Achievement Level: FULL

Goal 3: Addressing conjunctive surface water management issues – TWC

§36.1071(a)(4) and 31 TAC 356.52(a)(1)(D)

Objective 1: Participate in the regional water planning process by attending at least one South Central Texas Regional Water Planning Group (Region L) meeting per year.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the representatives of the DISTRICT, dates, and the number of meetings of the South Central Texas Water Planning Group attended.

The District addressed conjunctive surface water management issues through the attendance of meetings by district directors and the general manager, participating in the regional water planning process by attending at least one South Central Texas Regional Water Planning Group (Region L) meeting during the fiscal year. District representatives attended meetings of the South Central Texas Regional Water Planning Group (Region L) on the following dates: November 4, 2021; February 17, 2022; May 5, 2022;; August 2022.

Achievement Level: FULL

Goal 4: Addressing natural resource issues which impact the use and availability of groundwater, and which are impacted by the use of groundwater – TWC §36.1071(a)(5) and 31 TAC §356.52(a)(1)(E)

Objective 1: Develop and maintain a water quality monitoring program.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the monitoring activities including the number of wells monitored and the year-to-year change of water quality.

The District addressed natural resource issues which impact the use and availability of groundwater by maintaining a water quality monitoring program during the fiscal year. The District processed 4 separate water quality field measurements and no water quality lab measurements in the fiscal year. The District continues to collect valuable aquifer measurement to support the future assessment of water quality change on a county-wide basis.

The District collected field measurements for total dissolved solids from 4 wells during the fiscal year. The average total dissolved solids field measurement in year 2021 was 0.830 g/L. The average total dissolved solids field measurement in year 2021 was 0.856 g/L. The change in total dissolved solids in wells measured in year 2021 and wells measured in year 2022 is -0.023 g/L.

Achievement Level: FULL

Goal 5: Addressing drought conditions – TWC §36.1071(a)(6) and 31 TAC 356.52(a)(1)(F)

Objective 1: Collect and review drought condition information related to Refugio County and the surrounding region of Texas.

Performance Standard: Each year, the District will summarize within the annual report the drought condition information collected and reviewed.

The District addressed drought conditions by collecting and reviewing drought condition information related to Refugio County and the surrounding region of Texas by considering drought monitoring index information during meetings of the Board of Directors during the fiscal year. Drought condition information was reviewed at the meetings held on the following dates: October 18, 2021; January 17, 2022; April 18, 2022; July 18, 2022.

Achievement Level: FULL

Goal 6: Addressing conservation, recharge enhancement, rainwater harvesting, precipitation enhancement, or brush control, where appropriate and cost-effective – TWC §36.1071(a)(7) and 31 TAC 356.52(a)(1)(G)

Objective 1: Promote conservation, rainwater harvesting or brush control within Refugio County.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the activities directly related to conservation, rainwater harvesting or brush control including participation in scientific investigations and studies, educational materials developed and delivered to local schools, cooperative educational contributions and grants, public speaking events and presentations, community event participation, and educational publications.

The District addressed and promoted conservation, recharge enhancement, rainwater harvesting, precipitation enhancement, or brush control by updating the website of the District to include links to resources promoting rainwater harvesting, efficient use of groundwater, conjunctive use, subsidence prevention, brush management, and recharge enhancement.

The District addressed and promoted conservation, recharge enhancement, rainwater harvesting, precipitation enhancement, or brush control by sponsoring and participating in the UHV groundwater conservation project during the fiscal year.

Achievement Level: FULL

Goal 7: Addressing the desired future conditions adopted by the district under Section 36.108 – TWC §36.1071(a)(8) and 31 TAC 356.52(a)(1)(H)

Objective 1: Develop and maintain a water level monitoring program.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the water level monitoring activities including the number of wells monitored and the year-to-year change of water level.

The District addressed the desired future conditions adopted by the District by maintaining a water level monitoring program during the fiscal year. The District collected 12 water level measurements from water wells during the fiscal year.

The water level measurements stored within the groundwater monitoring database indicate depth to water has decreased (i.e., water level recovery) by 1.3 feet from year 2021 to year 2022.

Achievement Level:FULL

Objective 2: Analyze water level monitoring information to evaluate water level trends and determine the degree to which the DISTRICT is complying with the desired future conditions of Gulf Coast Aquifer in Refugio County.

Performance Standard: Each year, the DISTRICT will summarize within the annual report the water level trends and the conclusions regarding the DISTRICT's compliance with the desired future condition of the Gulf Coast Aquifer in Refugio County.

Based on the data developed by Intera, Inc. for water levels within the District, the estimate of water level change between year 2000 and year 2021 is -8.4 feet and the 3-year average of water level change- between year 2019 and 2021 is -5.3 feet. The use of a 3-year average of water level changes moderates the effects of the estimates of a single year and represents a measure of the recent trend. The consideration of the 3-year average water level change in the context of the measurement distribution offers a possibility that the condition of the aquifer is significantly better than the water level change from year 2000 to year 2021 indicates.

On July 18, 2022, the Board of Directors of the district found that sufficient information is not presently available to determine that the desired future condition for Refugio County is not being achieved.

Achievement Level: FULL

Section 2 - Evidence of Achievement of Management Plan Goals and Objectives

Goal 1: Providing the most efficient use of groundwater - TWC §36.1071(a)(1) and 31 TAC 356.52(a)(1)(A)

Objective 1: Develop and maintain a water well registration program for tracking well information for wells within Refugio County.

Evidence of Achievement: Well registration requests received during fiscal year.
