Regarding GMA 15 Joint Planning for 4th Planning Cycle

The representatives of Groundwater Management Area 15 met on January 8, 2026, at the consolidated offices of Victoria County, Calhoun County, Refugio, and Texana GCD in Victoria, Texas. Mr. Andruss

attended the meeting to participate in 4th Cycle of the Joint Planning as required under Chapter 36 of the Texas Water Code. See: <https://www.vcgcd.org/groundwater-management-area-15>.

Item 8 - Groundwater Policy

Topic 8.1 - Report

Regarding [Management Plan Revisions](#)

Regarding [Rule Amendments](#)

Regarding [Legislative Support and Lobbying](#)

Topic 8.2 - Management Recommended Rule Revisions

Management Discussion:

Previously, the Board authorized the drafting of proposed rule changes and publication of rulemaking notices for this meeting. Management had anticipated the completion of the brackish groundwater characterization project to support the proposal of designated deep saline production zones. The project is not complete which has contributed to the postponement of drafting proposed rule revisions. Staff anticipates the completion of the project in February 2026.

Management Recommendation:

Move to authorize the general manager and legal counsel to a draft set of proposed rules as well as publish and post all required notices to conduct a rulemaking hearing during the meeting scheduled on April 20, 2026.

Item 9 - Administration and Management

Topic 9.1 - Report

Regarding [General Administration](#)

For the past couple of weeks, staff have been addressing a significant issue regarding the records and work management system, Evernote Teams, used by RGCD and the other cooperating districts. Evernote provided CCGCD one billing cycle to either convert its Evernote Teams account to a new software tier referred to Evernote Enterprise or discontinue its use of the system. The price structure of Evernote Enterprise is not based on the number users as is Evernote Teams. Rather, Evernote Enterprise pricing is based on usage. Given CCGCD's long and extensive use of Evernote to manage workflows and the resulting records of the district, the annualized costs for CCGCD's subscription to Evernote would have jumped from \$2,500 to \$9,600.

Presently, the District pays a \$85.28 monthly fee for its Evernote Teams subscription. Evernote has not scheduled the District's Evernote subscription for conversion to Evernote Enterprise. Therefore, a precise cost associated with the future conversion is unknown.

Based on CCGCD's Evernote usage as compared to the Evernote usage of RGCD, TGCD, and VCGCD, management anticipated the combined cost of multiple subscriptions would approach \$48,000 for CY2026. In response to the deadline to take action regarding CCGCD's Evernote subscription and the substantial cost increases anticipated for the other cooperating district, management immediately investigated alternatives.

Only two viable options were identified: 1) consolidation of all archive and work management content of the cooperating district into a single Evernote Enterprise subscription or 2) migration of archive content to the Joplin and Joplin Cloud system and the consolidation of all work management content within a single Evernote Enterprise solution.

Based on the outcomes of staff's efforts evaluate and implement the options, the only feasible option was to migration of archive content to the Joplin and Joplin Cloud system at €6.69/user/month (with 3 users, the cost currently converts to \$240.40 per year per district) and the consolidation of all work management content within a single Evernote Teams subscription.

Staff have completed the consolidation of work management tasks under a single Evernote Teams subscription and anticipate completing the archive migration process in January 2026. When the archive migration for the District is complete, management will discontinue the District's subscription to Evernote Teams.

Management anticipates the technology costs associated with work management and records management will be less than the costs anticipated prior to the change in Evernote's subscription costs.

Regarding Director Compensation Processing

As of January 13, 2026, staff have process 2 fees of office payments during FY2026:

18. ACCTP-20260120-04 - \$250.00 - Cynthia Rose

Regarding Financial Audit

Staffs efforts to address the Evernote System issues delayed the authorization for Goldman, Hunt, and Notz (GHN) to initiate the audit for FYE20250930. On January 12, 2026, management authorized GHN to proceed with the audit of the District.

Regarding Technology.

In the future, the District will be required to ensure all content on the website of the District is ADA-compliant. Given the number of records published to the website of the District and the effort and cost required to make and maintain ADA-compliant files on the website, staff will immediately undertake a project unpublish and remove all records from the website whose publication is not required. Presently, the District has 301 files that are considered "Not Accessible" as an ADA-compliant record on the website of the district.

In November 2025, management received an special discount offer from Justin Erickson, Special District Manager for Streamline (website hosting service for the District) offering a subscription service to automate the process of providing ADA-compliant records to users of the websites of the District, VCGCD, CCGCD, and TGCD at a monthly cost of \$200 per district. Costs associate with a one-time revision of files is offered as a per page services estimated at a cost of \$7 per page

Management Discussion:

On December 17, 2025, the District received notice of the following:

The Texas Water Development Board (TWDB) is now accepting applications for Fiscal Year 2026 Agricultural Water Conservation Grants. Applications are due to the TWDB by Wednesday, March 18, at 2:00 p.m. CST.

Up to \$1,500,000 in grant funding is available to eligible political subdivisions and state agencies for agricultural water conservation projects that improve irrigation efficiency, enhance resilience to weather extremes and climate variability, and promote innovation in agriculture. Selected projects will further water conservation in the state and serve the public interest by supporting the implementation of water conservation strategies identified in the state and regional water plans. For more information, please view the full request for applications and application instructions on the TWDB's website.

The TWDB will host webinars on January 8, January 22, and February 4 that will provide additional information about the program and the application process. Please register in advance.
